Leading Newspapers of Ohio Say From the Cloveland Herald of March 28.

From the Cloveland Revald of March 25.

The orthography of the Worcester Dictionary is that used by most, if not all, authors of distinction in this country and England, and conforms to the general usage of ordinary writers and speakers.

Whatever prejudices may have existed previously, a careful study of this volume will invariably be fullowed by a warm appreciation of its great merits, and a desire to add it to the well selected library, be it large or small, it is a library in itself, and will remain an imperichable record of the learning of its compiler.

From the Cincinnati Commercial of April 20.

Here are upwards of a hundred thousand words—good, bad and indifferent—whose multifarious meanings and derivations, together with their correct spelling and pronunciation, are set clearly before the eye.. The work is unquestionably the greatest Thesaurus of English Words ever gublished.

Scrofula, or King's Evil, ROYAL QUARTO DICTIONARY

s a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not deatroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, fifth and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" infeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

their children." Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, cruptions or sores. This foul cor-ruption, which genders in the blood, depresses the energies of life, so that scrofulous constituions not only suffer from scrofulous com stand the attacks of other diseases; consequently vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly

in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or re aggravated by the same cause. One quarter of all our people are scrofulous heir persons are invaded by this lurking intection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and in-vigorate it by healthy food and exercise. Such a medicine we supply in
